

Packages - Bug #1814

[gnome-ring] icu error

2018-05-20 11:34 PM - pribib

Status: not-a-bug	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description	
i accidentally cleared the log but ring said	
[pribib@ed ~]\$ ring.cx gnome-ring: error while loading shared libraries: libicui18n.so.61: cannot open shared object file: No such file or directory	
[pribib@ed ~]\$ pacman -Ss icu core/icu 61.1-1 [installed: 60.2-1] International Components for Unicode library	
then i updated icu and now:	
[pribib@ed ~]\$ ring.cx gnome-ring: error while loading shared libraries: libicui18n.so.60: cannot open shared object file: No such file or directory	

History

#1 - 2018-05-21 03:13 AM - pribib

[pribib@ed ~]\$ stellarium
stellarium: error while loading shared libraries: libicui18n.so.60: cannot open shared object file: No such file or directory

maybe this is not a gnome-ring error

#2 - 2018-05-21 10:27 PM - ovruni

gnome-ring was removed. Use ring-gnome instead.

#3 - 2018-05-21 11:28 PM - bill-auger

- Status changed from open to not-a-bug

yes that explains a lot - you need to manually remove 'gnome-ring' and manually install 'ring' instead

i think the problem is that you have ring installed from before when it was a parabola package - last month arch started packaging it and they gave it a different name - but the parabola package was not automatically removed

remove all of ring, ring-gnome, ring-kde, gnome-ring, ring-daemon, ring-lrc libringclient, opendht if you have them
then install 'ring'

'stellarium' is also an arch package - you maybe just need to re-install that too - i am closing this issue but do open a new one if 'stellarium' is still a problem
