eliotime3000 -

for packages that are already in the repos - if there is no bug but there is an upgrade available, it is better to flag the packages as out of date on the packages website

https://www.parabola.nu/packages/libre/x86_64/iceweasel/

in this case it already is "Flagged out-of-date" - work has already begun on this upgrade but the new version broke a lot of things - this will take some time

#2 - 2018-06-04 05:02 PM - bill-auger

there is a version of iceweasel v60 in [libre-testing] now

#3 - 2018-06-04 09:18 PM - freemor

This version (x86_64) can not complete CloudFlare challenges.

Expected behaviour:

navigate to site
Get CF challenge
Jump through all the hoops
pass the challenge (green checkmark)
site loads

Behaviour in this version:

navigate to site
Get CF challenge
Jump through all the hoops
pass the challenge (green checkmark)
browser tries to load something (throbber on tab going)

stops loading and still on challenge page with green checkmark

This will be a major show stopper for people that use Tor or proxies and thus run into CF challenges all over the place.

To reproduce:

install iceweasel-1-60
set to proxy through Tor
Navigate to: <https://code.gitea.io>
Do CloudFlare challenge
See it try to load
See nothing happen

The new tab doesn't work (show a white page) and the styles of setting page look bad.

Second update of Firefox source code (60.0.2) now available.

Some stabilization updates are detailed here:

<https://www.mozilla.org/en-US/firefox/60.0.2/releasenotes/>

BTW, in the web interface of Parabola repos, the info of Iceweasel on libre-testing is not available. If anyone is interested to test the version 60 of Iceweasel and see how stable is this version, please move it into libre repo branch.

Thanks.

#6 - 2018-06-30 06:26 PM - nRoof

BTW, a new version 61.0 is available, with multiple security fixes: <https://www.mozilla.org/en-US/firefox/61.0/releasenotes/>

#7 - 2018-07-01 01:21 AM - eliotime3000

Thanks by the advice. The libre-testing branch is still on version 60.0.

#8 - 2018-07-09 02:16 AM - eliotime3000

Firefox released the first security update of version 61.

<https://www.mozilla.org/en-US/firefox/61.0.1/releasenotes/>

Many bugfixes are related with the behavior of the browser, which are: improvements for chinese sites with accesibility enabled, fixed missing content on New Tab page and home section of preferences, bugfixes for loss of favorites in merging process to version 60, improved playback for 1080p Twitch streams, and many others.
