

Packages - Bug #1820

qt5-webengine missing then Falkon not working

2018-05-23 03:37 AM - hd_scania

Status: duplicate	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description Please as soon liberate Qt5-WebEngine by removing "Pepper" Flash plugins and deps then publish under Parabola's own git service and build bins under [nonprism]. Falkon (the current KDE web browser merging QupZilla and Konqueror) needs this liberation to get working.
