

Packages - Packaging Request #1830

Let's revert Anki to version 2.0.*

2018-05-28 03:37 AM - Elon_Satoshi

Status: fixed	% Done: 0%
Priority: wish	
Assignee:	
Category:	
Description Anki 2.0 still uses qt-webkit instead of qt-webengine. For now, I'm installing aur/anki20 from the AUR.	
Related issues: Related to Packages - Freedom Issue #1426: [anki] depend on qt5-webengine in progress

- Status changed from open to fixed

there is a package 'anki-ccbc' in pcr-testing which is a fork of anki 2.0 - it needs a large amount of adaptation to be compatible with QT5; and seems to have other runtime problems - it is discussed in [#1426](#) - i will close this ticket in favor of [#1426](#)
