<b>Description</b>	
IRC user libreuser reported	
freshclam: error while loading shared libraries: libjson-c.so.3: cannot open shared object file: No such file or director	
I investigated. * installed clamav * issued the sudo freshclam command * It failed with the same error on my system	
I did a fresh pull from abslibre and rebuilt the package The rebuilt package works fine.	
This package should be queued for rebuild
