[qtcreator] unable to satisfy dependency 'clang=5.0.1' required by qtcreator

2018-07-03 04:20 AM - glumpo

Status: duplicate	% Done: 60%
Priority: bug	
Assignee: freemor	
Category:	
Description I am unable to install qtcreator with <code>pacman -S qtcreator</code> Because of broken dependency: "unable to satisfy dependency 'clang=5.0.1' required by qtcreator" Should I downgrade clang or fix to qtcreator is coming soon?	

History

#1 - 2018-07-03 08:02 PM - bill-auger

- Assignee set to bill-auger

needs rebuild against clang 6.0.0

#2 - 2018-07-05 07:15 PM - bill-auger

glumpo -

there is an upgrade for x86_64

4.6.2-1.parabola1

please let us know if this is working properly for you

1. `pacman -Sy qtcreator`

#3 - 2018-07-05 09:01 PM - glumpo

Yes, now it works perfect, thanks

#4 - 2018-07-07 09:01 AM - bill-auger

- Status changed from open to fixed

#5 - 2020-01-27 06:07 PM - libreuser

`pacman -Syu`

```
-> "unable to satisfy dependency 'clang=9.0.0' required by qtcreator"
```

#6 - 2020-01-28 01:53 AM - freemor

ops bill did you already start rebuilding these?

or is that assigned to old.

I've started rebuilding against clang=9.0.1 but it you are already partway there...

- Status changed from fixed to in progress

Guessing it was old.. set to me, set to inprogress

x86_64 rebuild vs new Clang
starting i686 build

#8 - 2020-01-28 11:25 AM - freemor

- % Done changed from 0 to 60

686 built and pushed.

Starting Arm build

#9 - 2020-01-28 12:33 PM - freemor

Or not... seems the current PKGBUILD fails on ARM. Haven't got the time right now to dig into it.

#10 - 2020-01-30 07:40 PM - theova

Please note that a newer version of qtcreator (4.11.0) is out. Current version in [libre] is 4.10.2.

I have submitted a patch to the mailing list, see <https://lists.parabola.nu/pipermail/dev/2019-December/007581.html>
The only thing which has changed in the meantime is the clang version, the rest of the PKGBUILD is still valid.

yes the assignment was old - this ticket was closed as 'fixed' on 2018-07-07

the current open ticket for qtcreator is [#2592](#)
