Packaging Request # 2164 (open): [iceweasel][iceweasel-addons] Provide /usr/lib/firefox symlink to drop iceweasel-specific extensions in favor of ones from Arch

[firefox-extension-privacybadger] Requires blacklisted firefox

2018-07-04 04:22 PM - nRoof

Status:	fixed	% Done:	0%
Priority:	broken		
Assignee:	oaken-source		
Category:			
Description			
So it should either be removed, or replaced with liberated package for iceweasel.			
I wonder if the alternative can be just to add provides=("firefox") to the PKGBUILD of iceweasel. Not sure though about negative implications of this, and also if it's acceptable by Parabola standards for package name to mention the blacklisted package.

- Tracker changed from Freedom Issue to Packaging Request

confirmed

```
$ sudo pacman -S firefox-extension-privacybadger
resolving dependencies...
warning: cannot resolve "firefox", a dependency of "firefox-extension-privacybadger"
:: The following package cannot be upgraded due to unresolvable dependencies:
   firefox-extension-privacybadger
```

```
$ pacman -Sg firefox-addons
firefox-addons firefox-extension-privacybadger
```

seeing as this is in a group named 'firefox-addons' there will presumably be more add-ons added soon

the simplest solution is to make 'iceweasel' to provides('firefox') or else all packages added to this group are going to need to be blacklisted or re-packaged for no reason other than changing the package name
