All of these three engines have non free artwork. I list them again:

Alien Arena.
Cube 2: Sauerbraten.
Assault Cube.

This shooter has free artwork:

Open Arena.

So Open Arena could be packaged without freedom issues.

The sauerbraten and sauerbraten-data entries in the blacklist could reference this issue.

i added the reference

are all of these related somehow? - if 'sauerbraten' is the only package in question, it is not clear why the others are mentioned on the same ticket, nor why it is a "packaging request" and not a "freedom issue" - are they all drop-in replacements?
