libretools - Bug #189

libremkchroot should umount when exiting with error

2012-09-01 10:00 AM - lluvia

Description

For example, I failed my previous command for libremkchroot, and I tried it a second time with the correct arguments, but it wanted to overwrite the mounted system, reporting errors.

Also, I didn't understand what was happening and I tried to remove the jail directory, without checking that my system was mounted in that directory!

It would be a good and simple behaviour to unmount if reporting error.
