<b>Description</b> Hello everyone, hope you all are doing well.  I am requesting that this theme for SDDM be added to the official Parabola repos. It is essential for the new desktop design I am working on for creating and adding the Cinnamon Desktop Environment option to the Calamares installer.  <a href="https://aur.archlinux.org/packages/simplicity-sddm-theme-git/">https://aur.archlinux.org/packages/simplicity-sddm-theme-git/</a>  Thank you for your assistance in getting this package added quickly. Take care and have an awesome day :)

the AUR PKGBUILD has 'GPL' as the license but the only indication that the GPL was intended to be the license is the 3 letters 'GPL' in the .desktop file - i dont think that is enough to qualify it as properly licenced - additionally, the GPL would not implicitly cover the binary-only images
