

libretools - Bug #19

[fullpkg-find] does not error if dependencies cannot be satisfied

2012-02-27 06:38 PM - mtjm

Status: not-a-bug	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description It should error at least in easy cases like having no package providing a dependency. This should use the same algorithm as pacman and its databases (abslibre-mips64el doesn't have arch=any packages which might cause such problems).	

History

#5 - 2015-06-07 01:05 AM - lukeshu

- Status changed from open to not-a-bug

fullpkg has been removed from git master in favor of dagpkg.
