<b>Category:</b>	
<b>Description</b>	
<p>I installed networkmanager, network-manager-applet and networkmanager-openvpn. I tried to add an existing VPN configuration but when I hit "Create" the window pops up really quick and closes immediately all the open network windows.</p> <p>I also did "systemctl start NetworkManager" and "systemctl enable NetworkManager" with success.</p> <p>local/network-manager-applet 1.8.14-1 local/networkmanager 1.12.0-1 (gnome) local/networkmanager-openvpn 1.8.4-1</p>	

#### History

##### #1 - 2022-05-08 08:47 PM - Zuss

Issue seems to have been fixed since then. Dialog box doesn't crash when adding an existing VPN configuration on v1.32.2

##### #2 - 2022-05-14 12:31 PM - Zuss

- Status changed from open to not-a-bug

If the issue still persists, please open a new ticket logs and system information (package version, architecture, init system, etc.)
