[initscripts]HOSTNAME issue about rc.sysinit

2012-09-03 06:46 PM - red54

Status: not-a-bug	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description I have deleted the line "HOSTNAME=xxx" from rc.conf, and use /etc/hostname, but it still says "HOSTNAME= is deprecated. See rc.conf(5) and hostname(5) for details." every starting up.

I suggest to you migrate to systemd due that initscript will not be support on our distro. As systemd is now the default init system, Parabola is receiving minimal testing on initscripts systems. Due to a lack of resources and interest, we are unlikely to work on fixing initscripts-specific bugs, and may close them as WONTFIX. Please see it => <https://parabolagnulinux.org/news/end-of-initscripts-support/>
