Packages - Bug #1922

QtCreator Clang version

2018-07-31 07:43 AM - brettgilio

Status:	fixed	**% Done:**	100%
Priority:	bug		
Assignee:	bill-auger		
Category:			

Description
QtCreator can not be installed from the repos, as it depends on Clang=6.0.0 Clang is currently at 6.0.1.

Subtasks:	
Bug # 1926: [pacman] Installing "qtcreator" resolves a bad dependency	**not-a-bug**

History

#1 - 2018-07-31 07:53 AM - brettgilio

/usr/lib/qtcreator/plugins/libQbsProjectManager.so: Cannot load library /usr/lib/qtcreator/plugins/libQbsProjectManager.so: (libqbscore.so.1.11: cannot open shared object file: No such file or directory)

This is an error I get when I launch QtCreator (after downgrading Clang to 6.0.0)

#2 - 2018-08-03 08:47 AM - bill-auger

- Assignee set to bill-auger
