

Packages - Bug #1932

[evolution] Remembers GnuPG password but not SMTP password

2018-08-03 05:35 PM - ani

Status: not-a-bug	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description When I use Evolution and send many emails I have to type in the SMTP password for each email while the GPG Signing system is fine with a one time + timelimit on the password memory. This is inconsistent.

This is probably the same issue as [#1937](#)
Please install and get gnome-keyring functioning properly.

#2 - 2018-08-13 01:52 AM - bill-auger

this issue appears to be very similar to [#1937](#)
