

## Packages - Freedom Issue #1935

[linux-pae] in i686 [testing] repo is probably non-free the same way as regular linux

<b>Description</b> The subject says it all. I didn't check whether it contains non-free blobs and firmwares, just noticed the new package on ParabolaWeb. It seems to be a new package in testing, which isn't yet available in i686 [core] repo.
