

## Packages - Bug #1939

### [electrum] Latest update fails to launch

2018-08-07 12:13 PM - ani

<b>Status:</b> fixed	<b>% Done:</b> 100%
<b>Priority:</b> bug	
<b>Assignee:</b> ovruni	
<b>Category:</b>	
<b>Description</b> I get this in the terminal when launching electrum:  [ecc] warning: libsecp256k1 library not available, falling back to python-ecdsa Error: Could not import PyQt5 on Linux systems, you may try 'sudo apt-get install python3-pyqt5'	

#### History

##### #1 - 2018-08-07 12:25 PM - freemor

Have you followed the information given there and installed either of the suggested things?  
but yes, it looks like libsecp256k1 should be added as a depends. and python-pyqt5

##### #2 - 2018-08-07 12:31 PM - ani

[freemor](#)

I have not.

##### #3 - 2018-08-07 12:33 PM - ani

[freemor](#)

I already have python-pyqt5 installed. I installed the other one and that got rid of the first error message only.

##### #4 - 2018-08-07 01:00 PM - freemor

Looking at the PKGBUILD it does indeed depend on python-qt5

.. And it fails even with python-pyqt5 installed.

This is a community package so can you please report the bug upstream to <https://bugs.archlinux.org>

Please be more thorough reporting it there.  
make sure python-qt5 is installed.  
make sure it still fails the same.

Then report it upstream noting that python-qt5 is indeed installed  
The version of the electrum package you are using.  
The terminal output

##### #5 - 2018-08-08 05:48 AM - ani

[freemor](#)

Did this: <https://bugs.archlinux.org/task/59556>

They said just recently that I should stop doing it.

##### #6 - 2018-08-08 04:37 PM - ovruni

python-pyqt5 was updated, you can try now.

##### #7 - 2018-08-08 04:44 PM - ani

[ovruni](#)

It's resolved for me after the last update. Thanks.

##### #8 - 2018-08-08 04:48 PM - ovruni

- % Done changed from 0 to 100
- Assignee set to ovruni
- Status changed from open to fixed
