

pbot-ng - Bug #1952

[pbot]: 'translate' command bugs

2018-08-15 12:25 AM - bill-auger

Status: open	% Done: 0%
Priority: bug	
Assignee: bill-auger	
Category:	
Description	
presence of the token 'is' in translate command triggers the "set factoid" procedure	
command: pbot: translate libreuser is still happy expected: *libreuser Es quieto feliz actual: bill-auger: Remembered.	
if first token following 'translate' matches a nick in the roster, translate the previous message(s) from that user currently, this is expected to fail (not yet implemented)	
command: pbot: translate libreuser was still happy expected: bill-auger said: *libreuser era quieto feliz actual: (not yet implemented)	
this works	
command: pbot: translate libre user was still happy expected: bill-auger said: *libre El usuario era quieto feliz actual: bill-auger said: *libre El usuario era quieto feliz
