- Status changed from open to info needed

I am unable to reproduce this issue. Acutall writing this from Arora

What type of maching?

What DE?

Any other useful info you can provide.

#2 - 2018-08-16 11:46 PM - libreuser

kde plasma
openrc

I saw into its web: <https://github.com/Arora/arora/releases>

that the last release was on 27 Sep 2010. ./ Is that appropriate?

#3 - 2018-08-17 12:06 AM - freemor

The Desktop Environment and openrc might be hellpful

The git and the last release date is less useful.

I was meaning more the exact steps to reproduce. Such as navigate to where?

Also are you on i686, armv7h, x86_64?

#4 - 2018-08-17 12:24 AM - libreuser

x86_64

#5 - 2018-08-17 01:08 AM - freemor

- Status changed from info needed to open

- Subject changed from [arora]: Crash to [arora]: Crashes on some pages

Ok that was helpful.

The second site crashes the browser pretty much every time.

But it is also exactly the type of site that is known for doing evil things to browsers.

I don't have the time tonight to dig into to.

But since the browser handled things like youtube or and hasn't see a new version in about 8 years.

I'm suspecting the site is just too "heavy" for the browser.

#6 - 2018-08-17 01:45 AM - freemor

Did a quick look with the web inspector in Surf.

Site is following the classic pattern for this type of site.

91 separate errors many dealing with same-origin policy

I think it may be more of a site problem (but Arora could maybe handle the situation more gracefully)

#7 - 2018-09-07 07:10 PM - freemor

Looking at this projects github page it looks like a mostly dead project.

Should we delete this from PCR?

Unless anyone objects I'm inclined to close this bug as an upstream issue with no active upstream.

#8 - 2022-05-08 08:33 PM - Zuss

There's been no commits since 2017, trying to install the packages produces unresolvable dependencies:

```
warning: cannot resolve "qt4", a dependency of "qtwebkit"  
warning: cannot resolve "qtwebkit", a dependency of "arora"
```

[bill-auger](https://labs.parabola.nu/issues/2165#note-10) mentioned as well that he would be in favour of dropping this package too: <https://labs.parabola.nu/issues/2165#note-10>
