

## Packages - Bug #1966

### [guake][openrc]: guake wont start on i686

2018-08-25 11:28 AM - bill-auger

<b>Status:</b> open	<b>% Done:</b> 0%
<b>Priority:</b> bug	
<b>Assignee:</b>	
<b>Category:</b>	
<b>Description</b>	
the guake package comes from archlinux32	
i did not have this problem with systemd on x86_64 so im not sure yet if this is a problem with openrc, dbus, or is specific to i686	
<pre>\$ guake Guake not running, starting it Traceback (most recent call last):   File "/usr/lib/python3.6/site-packages/dbus/bus.py", line 175, in activate_name_owner     return self.get_name_owner(bus_name)   File "/usr/lib/python3.6/site-packages/dbus/bus.py", line 361, in get_name_owner     's', (bus_name,), **keywords)   File "/usr/lib/python3.6/site-packages/dbus/connection.py", line 651, in call_blocking     message, timeout) dbus.exceptions.DBusException: org.freedesktop.DBus.Error.NameHasNoOwner: Could not get owner of name 'org.guake3.RemoteControl': no such name  During handling of the above exception, another exception occurred:  Traceback (most recent call last):   File "/usr/lib/python3.6/site-packages/guake/main.py", line 273, in main     remote_object = bus.get_object(DBUS_NAME, DBUS_PATH)   File "/usr/lib/python3.6/site-packages/dbus/bus.py", line 241, in get_object     follow_name_owner_changes=follow_name_owner_changes)   File "/usr/lib/python3.6/site-packages/dbus/proxies.py", line 248, in __init__     self._named_service = conn.activate_name_owner(bus_name)   File "/usr/lib/python3.6/site-packages/dbus/bus.py", line 180, in activate_name_owner     self.start_service_by_name(bus_name)   File "/usr/lib/python3.6/site-packages/dbus/bus.py", line 278, in start_service_by_name     'su', (bus_name, flags)))   File "/usr/lib/python3.6/site-packages/dbus/connection.py", line 651, in call_blocking     message, timeout) dbus.exceptions.DBusException: org.freedesktop.DBus.Error.ServiceUnknown: The name org.guake3.RemoteControl was not provided by any .service files  During handling of the above exception, another exception occurred:  Traceback (most recent call last):   File "/usr/bin/guake", line 10, in &lt;module&gt;     sys.exit(exec_main())   File "/usr/lib/python3.6/site-packages/guake/main.py", line 388, in exec_main     if not main():   File "/usr/lib/python3.6/site-packages/guake/main.py", line 287, in main     from guake.guake_app import Guake   File "/usr/lib/python3.6/site-packages/guake/guake_app.py", line 36, in &lt;module&gt;     gi.require_version('Gtk', '3.0') AttributeError: module 'gi' has no attribute 'require_version'</pre>	

### History

#1 - 2018-08-25 12:19 PM - bill-auger

looks very similar to this open upstream issue <https://github.com/guake/guake/issues/1349>

#2 - 2018-08-26 04:09 PM - ovruni

guake (i686) needs to be rebuilt for python3.7

Can you try installing guake-3.3.2-2 (x86\_64)?

**#3 - 2018-08-27 11:06 AM - bill-auger**

yea - thats what the archlinux32 guys said too

and no i cant try the x86\_64 package - my main PC died this week - ill be in 32bit-land for some time

the only reason i noticed this was because i filed a bug report upstream and they just responded this week - so i wanted to see if that bug still exists

<https://github.com/Guake/guake/issues/1277>

they asked me to try building from git if the scrolling bug still exists
