#3 - 2018-09-13 05:34 PM - ThisIsMyAccount

I fixed this on my end by updating youtube-dl to the latest. The one in Parabola's repos was behind, so I had to use pip to get the latest:

```
pip3 install --upgrade youtube-dl
```

#4 - 2018-09-14 07:25 PM - freemor

- Status changed from open to fixed

[ThisIsMyAccount](#) You may have Boned your system by using pip. third party package managers can do fairly evil things to many linux systems.

This seems to be fix by youtube-dl-2018.09.10-1 (I DL'd the URL in question with out a hitch) So I'm closing this.
