

Packages - Packaging Request #1985

[linux-libre] for [armv7h] Please enable CONFIG_ARM_LPAE

2018-09-13 05:41 AM - lukeshu

Status: open	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description LPAE is the mechanism that allows 32-bit ARM to use more than 4GB of RAM. This is a useful thing to have enabled. It is currently not enabled. <pre>\$ cat /proc/version Linux version 4.18.6-gnu-1 (builduser@parabola) (gcc version 8.2.0 (GCC)) #1 SMP PREEMPT Sat Sep 8 15:23:19 UTC 2018 \$ zgrep CONFIG_ARM_LPAE /proc/config.gz # CONFIG_ARM_LPAE is not set</pre>
