Category:	
Description Attaching a version from a web browser vs a version from choqok. It's the same post displayed differently.	

History

#1 - 2018-09-20 10:40 AM - freemor

Most likely related to, or a duplicate of:

https://bugs.kde.org/show_bug.cgi?id=363986

#2 - 2018-09-20 11:18 AM - ani

[freemor](#)

It might be related but what I'm have problems with is that no images at all ever get displayed.

#3 - 2018-09-20 11:51 AM - freemor

on all post or only posts with multiple images?

#4 - 2018-09-20 11:54 AM - ani

[freemor](#)

Like I said, it's all posts.

#5 - 2018-09-20 01:56 PM - freemor

Was just looking for clarity. the images you posted seem to show a post with 2 (thus multiple) images.

Unfortunately I do not have multiple SM accounts so would be very hard for me to debug this. Hopefully some other dev has the time and the requisite SM accounts.

Maybe you should remove or mask these screenshots. They contain public data but they are tied to one user which feels invasive to me.
