

Packages - Bug #1998

[liferea] Marks all posts as read without user interaction

2018-09-21 02:44 PM - ani

Status:	open	% Done:	0%
Priority:	bug		
Assignee:			
Category:			
Description I use Liferea for reading RSS feeds and when I get an update of new posts, Liferea will mark everything as read if I click on anything in the left side panel (attaching screenshot) while posts are available to be read. The whole feed is cleared out by a mouse click which is not how Liferea is supposed to work. You mark the posts as read manually by clicking in the menu and clicking "Mark all posts as read".			

History

Wife uses Liferea on an Arch machine and reports this is behaviour see see there too so probably an upstream issue,
Given <https://sourceforge.net/p/liferea/bugs/1129/> It probably a fully upstream issue,

#2 - 2018-10-28 05:27 PM - ani

Does it need to be submitted upstream or not?
