

dbscripts - Bug #2000

[db-import-pkg] Needs to share *-keyring packages between architectures

2018-09-21 11:18 PM - lukeshu

Status:	fixed	% Done:	100%
Priority:	bug		
Assignee:	lukeshu		
Category:			
Description			
Currently, there's no automated process for copying archlinux32-keyring from core-i686 to libre-x86_64 or libre-armv7h. Likewise for archlinuxarm-keyring.			
I'm not sure what a good solution looks like.			

History

#1 - 2018-09-25 05:25 AM - lukeshu

I committed a db-import-keyring program to git, but it doesn't import the source-packages... which I now realize is fine, because Arch 32 and Arch ARM don't publish those.

- Assignee set to lukeshu

#3 - 2018-09-25 11:38 PM - lukeshu

- % Done changed from 0 to 90

Hopefully fixed in v20180925 with the addition of db-import-keyring. We'll see that all goes well, then blacklist archlinux{32,arm}-keyring in blacklist.txt.

#4 - 2018-09-27 03:58 PM - lukeshu

- % Done changed from 90 to 100
- Status changed from open to fixed

As of dbscripts v20180925.2, db-import-keyring is working splendidly.
I've now blacklisted archlinux32-keyring and archlinuxarm-keyring to prevent them from being imported by db-import-pkg.
