

Packages - Bug #2008

[redshift] error, new version available upstreamM

2018-09-25 09:40 AM - egils

Status: fixed	% Done: 0%
Priority: bug	
Assignee: ovruni	
Category:	
Description Version bumped in arch community to 1.12. The gtk-program in our libre version errors with: \$ redshift-gtk Traceback (most recent call last): File "/usr/bin/redshift-gtk", line 26, in <module> from redshift_gtk.statusicon import run File "/usr/lib/python3.6/site-packages/redshift_gtk/statusicon.py", line 32, in <module> import gi File "/usr/lib/python3.6/site-packages/gi/__init__.py", line 42, in <module> from . import gi <i>ImportError: cannot import name '_gi' from 'gi' (/usr/lib/python3.6/site-packages/gi/__init__.py)</i> The non-gtk version works fine.
