Description	
hi,	
i recently install dovecot, with latests updates (2018-10-13) parabola-gnu x86_64,	
enabling the sieve plugin throws:	
<pre>Oct 13 20:35:23 imap(bit4bit): Error: Couldn't load required plugin /usr/lib/dovecot/modules/lib90_sieve_plugin.so: dlopen() failed: /usr/lib/dovecot/modules/lib90_sieve_plugin.so: undefined symbol: mail_deliver_ctx_get_log_var_expand_table</pre>

hi, now we have virtual_transport lmtp enabled, here we public our development enviroment

<https://efossils.somxslibres.net/fossil/user/bit4bit/repository/plataforma@somxslibres.net/dir?name=ecorreio/hyperbola/template>

i recently update dovecot to 2.3.3-2,
but same error persist.

```
Nov 05 03:21:34 imap(bit4bit): Error: Couldn't load required plugin /usr/lib/dovecot/modules/lib90_sieve_plugin.so: dlopen() failed: /usr/lib/dovecot/modules/lib90_sieve_plugin.so: undefined symbol: mail_deliver_ctx_get_log_var_expand_table
```
