

libretools - Bug #2040

[librechroot] sync can be slow, even on btrfs

2018-10-16 03:52 AM - lukeshu

Status: Priority: Assignee: Category:	open bug	% Done: 0%
Description If a chroot contains a whole bunch of data (like, say, the 4GB mozilla-unified hg repo), then find "\$1" -mindepth 1 -xdev -depth -inum 256 -print0 might take a while to scan it for nested subvolumes, even though there's not much to find. See also: my proposed btrfs_subvolume_delete that I submitted to arch-projects February 2017.
