Description	
<p>This is what happens when I try to install ttf-pfc:</p> <pre>:: Proceed with installation? [Y/n] :: Retrieving packages... ttf-font-awesome-5.... 166.2 KiB 542K/s 00:00 [#####] 100% (35/35) checking keys in keyring [#####] 100% (35/35) checking package integrity [#####] 100% error: ttf-pfc: signature from "Márcio Silva <coadde@hyperbola.info>" is marginal trust :: File /var/cache/pacman/pkg/ttf-pfc-20150920-1-any.pkg.tar.xz is corrupted (invalid or corrupted package (PGP signature)). Do you want to delete it? [Y/n] error: failed to commit transaction (invalid or corrupted package) Errors occurred, no packages were upgraded.</pre> <p>I recall that I have been at the devs numerous times about this but I fail to find a bug report about it when searching for it here.</p> <p>I have tried to do most things when I first encountered this. "pacman-key --refresh-keys" is tried as well as "pacman-key --updatedb". If I remember correctly I have also tried to flush the entire PGP database that Pacman uses without anything changing in terms of success.</p>

theres nothing you can do about that package - the person who packaged it is no longer a parabola dev - it just needs to be rebuilt

#2 - 2018-10-30 07:24 AM - ani

[bill-auger](#)

It prevents me from installing ttf-fonts-meta. Are you going to rebuild it?
