Description			
Needs Rebuild against icu			
NOTE: remember to rebuild 'nonprism/icedove', 'icedove-extension-enigmail', and 'libre/icedove-l10n' if the version has changed - all of these are coupled to each specific version of icedove, to avoid breakage

A new rebuild is needed:

```
XPCOMGlueLoad error for file /usr/lib/icedove/libxul.so:  
libcui18n.so.67: cannot open shared object file: No such file or directory  
Couldn't load XPCOM.
```

#13 - 2021-11-30 01:49 PM - dllud

Installing icu-compat-67 works around it for the time being.
