

Packages - Bug #2061

[mosh] (possibly others) need rebuilding against newer protobuf libraries.

Description	
<pre>1. ls -l /usr/lib/libprotobuf* /usr/lib/libprotobuf-c.so /usr/lib/libprotobuf-c.so.1 /usr/lib/libprotobuf-c.so.1.0.0 /usr/lib/libprotobuf-lite.so /usr/lib/libprotobuf-lite.so.16 /usr/lib/libprotobuf-lite.so.16.0.0 /usr/lib/libprotobuf.so /usr/lib/libprotobuf.so.16 /usr/lib/libprotobuf.so.16.0.0</pre>	
e.g. for [mosh]	
<pre>1. ldd /usr/bin/mosh-* grep libprotobuf libprotobuf.so.15 => not found libprotobuf.so.15 => not found</pre>	

History

#1 - 2018-11-02 04:54 PM - freemor

if you look at your output you'll notice that protobuf is newer than what mosh is looking for

```
/usr/lib/libprotobuf.so.16
```

```
ldd /usr/bin/mosh-* | grep libprotobuf
libprotobuf.so.15 => not found
```

mosh is looking for an older protobuf.
mosh needs to be rebuilt
mosh is from [community]
community comes from Arch.

#2 - 2018-11-02 05:14 PM - freemor

- Subject changed from [protobuf] all its dependencies are broken because of a soname change to [mosh] (possibly others) need rebuilding against newer protobuf libraries.

#3 - 2018-11-02 06:31 PM - abumann

I pushed mosh-1.3.2-5.0 i686 into Archlinux32 stable.

Now linking seems ok:

```
ldd /usr/bin/mosh-* | grep libprotobuf
libprotobuf.so.16 => /usr/lib/libprotobuf.so.16 (0xb7b7f000)
libprotobuf.so.16 => /usr/lib/libprotobuf.so.16 (0xb7b79000)
```
