Packages - Bug #2097

[manaplus] missing shared library

2018-11-22 05:02 AM - ani

Status:	not-a-bug	**% Done:**	0%
Priority:	bug		
Assignee:			
Category:			

Description
My system is x86_64, I installed manaplus-1.8.9.1-1.
Launching manaplus gives output:
manaplus: error while loading shared libraries: libSDL_gfx.so.16: cannot open shared object file: No such file or directory

History

#1 - 2018-11-22 12:50 PM - freemor

Do you have the sdl_gfx package installed?

#2 - 2018-11-22 12:59 PM - ani

freemor

extra/sdl_gfx 2.0.26-3 [installed]
SDL graphics drawing primitives and other support functions

Note that it is the wrong version by the major so it should presumably be 1.6 according to what is linked.

#3 - 2018-11-22 01:25 PM - freemor

Manaplus is from Community
sdl_gfx is from extra

I can not rebuild that for you.

You could use asp to pull the PKGBUILD and rebuild in manually, or wait for the Comminity maintainer to clue in.

#4 - 2022-05-08 08:02 PM - Zuss

sdl_gfx is listed as a dependency now and both packages are in Community. Manaplus starts without errors on v2.1.3.17

#5 - 2022-05-14 12:27 PM - Zuss

- *Status changed from open to not-a-bug*
