cups-filters-1.21.6-1.par1-i686 not building with libremakepkg

2019-01-18 02:36 PM - GNUtoo

Status: fixed	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description	
<pre>\$ sudo libremakepkg -n parabola-i686</pre>	
(parabola-i686 is an i686 chroot)	
results in:	
<pre>checking dirent.h presence... yes checking for dirent.h... yes checking sys/ioctl.h usability... yes checking sys/ioctl.h presence... yes checking for sys/ioctl.h... yes checking jpeglib.h usability... yes checking jpeglib.h presence... yes checking for jpeglib.h... yes checking for library containing jpeg_destroy_decompress... -ljpeg checking for LIBPNG... no configure: error: in `/build/cups-filters/src/cups-filters-1.21.6': configure: error: The pkg-config script could not be found or is too old. Make sure it is in your PATH or set the PKG_CONFIG environment variable to the full path to pkg-config. Alternatively, you may set the environment variables LIBPNG_CFLAGS and LIBPNG_LIBS to avoid the need to call pkg-config. See the pkg-config man page for more details. To get pkg-config, see <http://pkg-config.freedesktop.org/>. See `config.log' for more details ==> ERROR: A failure occurred in build(). Aborting...</pre>
