mplayer-38101-2.parabola1-i686 not building with libremakepkg

2019-01-18 02:45 PM - GNUtoo

Status:	fixed	% Done:	0%
Priority:	bug		
Assignee:	GNUtoo		
Category:			
Description			
<pre>\$ sudo libremakepkg -n parabola-i686</pre>			
(parabola-i686 is an i686 chroot)			
results in:			
[...]			
<pre>cc -MMD -MP -Wundef -Wstrict-prototypes -Wmissing-prototypes -Wdisabled-optimization -Wno-pointer-sign -Wdeclaration-after-statement -std=gnu99 -D_POSIX_C_SOURCE=200112 -D_XOPEN_SOURCE=600 -D_ISOC99_SOURCE -I. -Iffmpeg -march=i686 -mtune=generic -O2 -pipe -fstack-protector-strong -fno-plt -g -fvar-tracking-assignments -fdebug-prefix-map=/build/mplayer/src=/usr/src/debug -fno-tree-vectorize -fno-asynchronous-unwind-tables -D_LARGEFILE_SOURCE -D_FILE_OFFSET_BITS=64 -D_LARGEFILE64_SOURCE -march=i686 -mtune=generic -O2 -pipe -fstack-protector-strong -fno-plt -g -fvar-tracking-assignments -fdebug-prefix-map=/build/mplayer/src=/usr/src/debug -D_FORTIFY_SOURCE=2 -DPIC -D_REENTRANT -I/usr/include/ -DZLIB_CONST -c -o stream/stream_smb.o stream/stream_smb.c</pre>

==> ERROR: A failure occurred in build().			
Aborting...			
The upstream ¹ mplayer has the same versions and the same patches for x86_64. On i686, mplayer-glibc-2.27.patch was added on our side, but here it seem to fail because of samba.
