History

#1 - 2019-01-20 07:07 PM - bill-auger

- Subject changed from [systemd] package fails integrity check on x86_64 due to key that "is unknown trust" to [systemd]: error: signature from bill-auger is unknown trust

all i can say is that the keyserver network is behaving poorly today - the keys are clearly not propagating across the net as they should - i updated it yesterday on the MIT keyring server - it took several hours but eventually the MIT keyring server verifies that the expiry was extended

<https://pgp.mit.edu/pks/lookup?op=vindex&search=0x3954A7AB837D0EA9CFA9798925DB7D9B5A8D4B40>

that web page above shows on the very bottom line that on 2019-01-19 the expiration was extended to 2019-03-20 - today, the ubuntu keyserver now agrees with the MIT server (it did not yesterday)

<https://keyserver.ubuntu.com/pks/lookup?search=bill-auger&op=vindex>

but the sks-keyservers.net keyserver still does not have the update and i think that one is the default server used by pacman

<https://sks-keyservers.net/pks/lookup?op=vindex&search=0x3954A7AB837D0EA9CFA9798925DB7D9B5A8D4B40>

to get this working today, you (probably everyone) may need to specify one of the sane keyservers like so

```
pacman-key --keyserver hkp://keyserver.ubuntu.com --refresh-keys bill-auger
pacman-key --updatedb
```

or maybe someone else could re-package them (both x86_64 and i686)

#2 - 2019-01-24 02:03 AM - bill-auger

ok - it looks like that the sks-keyservers.net keyserver has the update finally

this is probably a bug no more
