History

#1 - 2019-02-02 11:12 AM - grizzlyuser

Can you reproduce this with the new profile? I couldn't on random webpages. So it seems this issue is either related to old profile, or has some more specific steps.

#2 - 2019-02-02 11:16 AM - oaken-source

yes, I can reproduce this on a clean profile.

#3 - 2019-02-02 11:38 AM - bill-auger

the problem is more severe - some of the most important options do not even work, such as "open in new tab", "open in new window"

#4 - 2019-02-02 12:25 PM - bill-auger

- Assignee set to oaken-source

#5 - 2019-02-03 10:56 AM - grizzlyuser

What's weird is that I still cannot reproduce any of the issues previously mentioned. Totally removed iceweasel package and ~/.mozilla folder, then installed latest 1:65.0-1.parabola1.testing2 (x86_64) and started as usual. No extensions are installed (like iceweasel-ublock-origin or iceweasel-noscript).

#6 - 2022-04-23 09:02 PM - bill-auger

- Assignee changed from oaken-source to bill-auger

#7 - 2022-04-23 09:03 PM - bill-auger

- Status changed from open to fixed
