<b>Description</b> I've stumbled upon this piece of software in my search for an XMPP-IRC bridge, it is available in the AUR: <a href="https://aur.archlinux.org/packages/biboumi/">https://aur.archlinux.org/packages/biboumi/</a> And (as far as I can tell) it is free software, I've searched the Parabola repos and the issue tracker and haven't found anything about it, hence why I'm opening this issue.	

### History

#### #1 - 2019-02-14 06:13 AM - bill-auger

FWIW i wrote an IRC-to-"everything" bridge a few years back - still works - i compiled it and used it a few months ago

<https://github.com/bill-auger/bridgin>

also, 'bitlbee', which already is in parabola accomplishes much the same today

#### #2 - 2019-02-15 11:02 AM - CBotulinum

I tried both suggested options and they didn't work out as biboumi, also, AFAIK bitlbee is useless as a bot...

I tried biboumi on my Arch GNU/Linux workstation, and it worked fine, I just don't want to have to always manually compile it for my server, is there a chance for it to be added to Parabola?

#### #3 - 2019-02-19 05:18 PM - CBotulinum

Well, I got matterbridge to work, so I don't think this is really needed, anyhow, you know better.

- Status changed from open to not-a-bug

in most cases where two programs have exactly the same functionality, i would say that any distro only needs one of them

parabola does not have any packaging automation, so every new package adds to the human workload
