[hexchat]: Alert that blinks the tray icon stops erroneously

2019-03-01 04:21 PM - ani

Status: unconfirmed	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description	
Setup	
I'm running Hexchat version 2.14.2.r9.ged553301-1.parabola1 and I have checked <i>Blink tray icon on to Private Message</i> , I have also unchecked <i>Open a new tab when you receive a private message</i> .	
Problem	
When I get a private message the tray icon blinks and it stops blinking when I focus the main window .	
Expected behaviour	
The tray icon should not stop blinking if there are private messages waiting to be focused.	
System information	
Parabola GNU/Linux-libre Hexchat 2.14.2.r9.ged553301-1.parabola1

Steps to reproduce

- Open **Hexchat**.
- Go *Settings -> Preferences*.
- Go *Channel switcher*.
- Check *Open a new tab when you receive a private message*.
- Go *Alerts*.
- Check *Blink tray icon on to Private Message*.
- Click *OK*.
- Connect to a server.
- Receive a private message in a new window while **Hexchat** is not focused.
- Focus the main window.
