<b>Description</b>	
<pre>\$ gnome-weather  (org.gnome.Weather.Application:4777): Gtk-WARNING **: 01:40:25.387: Locale not supported by C library. Using the fallback 'C' locale.</pre>	

#### History

##### #1 - 2019-03-07 12:44 PM - freemor

This is most likely because you have not set your locale  
Many programs will have issues with the default 'C' locale

Edit your /etc/locale.gen  
uncomment the correct locale or locales  
run locale-gen as root  
then edit /etc/locale.conf to configure those locales  
(see man locale.conf for details)

##### #2 - 2019-03-07 03:11 PM - bill-auger

if the locale is unset on the LXDE ISO, that would be a bug - the locales are pre-generated for all ISOs when the ISO is built; and the very first thing you see when one of the graphical ISOs boot is an ncurses language selector

exactly which ISO are you referring to ?

##### #3 - 2019-03-07 03:36 PM - freemor

I was assuming that this was post install.

Also re-reading the error I'm wondering if the locale is set just set weirdly as the error states "not supported. Falling back to..."

If you (the original poster) can attach the output of running:

locale

in a terminal that would be helpful. Also clarify if this is using the live image or post install.

thanks

##### #4 - 2019-03-07 03:40 PM - bill-auger

i was going on the assumption that it was related to the live system, because it was posted on the "Installation media" tracker - if the problem is on the installed system, then its just a typical "packages" bug

arescorpio -

is this about the behavior of the LiveISO, or after you installed to hard disk?

##### #5 - 2019-03-08 03:06 AM - arescorpio

bill-auger : in my hard disk

##### #6 - 2019-03-08 05:12 PM - bill-auger

- Description updated

- Subject changed from *On my parabola X86\_64 openrc systemd the program : gnome-weather , not run , please my petition ,thank to [gnome-weather] not run with 'C' locale*

- Project changed from *Installation Media* to *Packages*

**#7 - 2019-03-08 05:16 PM - bill-auger**

arescorpio -

what is the output of these commands?

```
$ locale
```

```
$ locale -a
```

**#8 - 2019-03-09 08:34 AM - arescorpio**

```
[arescorpio@arescorpio ~]$ locale

Solventado! (solucionado)

con la ultima update de gnome-weather .

I m sorry my english is very bad . Gracias no se english .

**#10 - 2022-05-08 06:53 PM - Zuss**

Looks like it was resolved with an update. Runs without issue on v42.0

**#11 - 2022-05-14 12:22 PM - Zuss**

- Status changed from unconfirmed to not-a-bug
