<b>Category:</b>	
<b>Description</b>	
<pre>\$ sdcc --help [...]</pre>	
<pre>    --use-non-free      Search / include non-free licensed libraries and header files [...]</pre>	
<pre>\$ pacman -Q -l sdcc   grep non-free/\$ sdcc /usr/share/sdcc/non-free/</pre>	

### History

#### #1 - 2019-03-10 09:51 PM - GNUtoo

Many of the files in `/usr/share/sdcc/non-free/` have something like that:

```
* For pic device libraries and header files which are derived from
* Microchip header (.inc) and linker script (.lkr) files Microchip
* requires that "The header files should state that they are only to be
* used with authentic Microchip devices" which makes them incompatible
* with the GPL. Pic device libraries and header files are located at
* non-free/lib and non-free/include directories respectively.
* Sdcc should be run with the --use-non-free command line option in
* order to include non-free header files and libraries.
*
* See http://sdcc.sourceforge.net/ for the latest information on sdcc.
```

- Status changed from confirmed to duplicate

This is a duplicate version of [#2160](#).

There is already a Patched package in testing.. No one ever tested it. Please feel free to do so.
