[umbrello]: Missing shared object file causes startup to fail instantly

2019-03-22 02:41 PM - ani

Status: fixed	% Done: 100%
Priority: bug	
Assignee: freemor	
Category:	
Description My system: x86_64 Parabola GNU/Linux-libre. Updated via pacman 2019-03-22 twenty to four. The error is that I execute umbrello5 so the Umbrello program is launching, the program exits instantly with an error message: umbrello5: error while loading shared libraries: libKDevPlatformTests.so.53: cannot open shared object file: No such file or directory Expected behavior is that the program will launch and not exit prematurely.	

History

#1 - 2019-03-29 11:25 AM - freemor

looks like [libre/kdevelop] has gotten a little stale.
Hopefully it can still be built without qt-webengine

#2 - 2019-03-29 11:28 AM - freemor

Giving it a try with a freshened PKGBUILD

#3 - 2019-03-29 01:20 PM - freemor

Built ok. But libKDevPlatformTests.so.5 still missing due to

```
-DBUILD_TESTING=OFF
```

in our version of the PKGBUILD. commenting that out , rebuilding.

- Assignee set to freemor
- Status changed from unconfirmed to confirmed

#5 - 2019-03-29 05:00 PM - freemor

- % Done changed from 0 to 30
- Status changed from confirmed to in progress

x86_64 -> build, tested, pushed.. Missing lib is now present.

Starting build on other two ARCHs
