

Packages - Bug #2280

QT GUI programs wont start on 32bit systems

2019-04-12 03:04 PM - v3d

Status: not-a-bug	% Done: 100%
Priority: bug	
Assignee:	
Category:	
Description Octopi fails to run on 32bit systems Cannot mix incompatible Qt library (version 0x50c02) with this library (version 0x50c01) Aborted (core dumped)	
Subtasks: Bug # 2281: smplyser broken on 32 bit systems duplicate	

History

#1 - 2019-04-12 05:29 PM - freemor

runs fine on my i686 system.

Please ensure your system in in a consistent state by issuing:

```
sudo pacman -Suy
```

at the commandline. If the problem persists please provide exact steps to reproduce.

#2 - 2019-04-12 05:29 PM - freemor

- Status changed from unconfirmed to info needed

#3 - 2019-04-12 08:26 PM - v3d

```
$ sudo pacman -Suy
:: Synchronizing package databases...
libre           346,6 KiB  1238K/s 00:00 [-----] 100%
core is up to date
extra is up to date
community is up to date
pcr is up to date
:: Starting full system upgrade...
there is nothing to do
```

It's easily reproduced just by running octopi. Something is off with QT since it0s the same with [#2281](#)

```
$ octopi
qt5ct: using qt5ct plugin
Cannot mix incompatible Qt library (version 0x50c02) with this library (version 0x50c01)
Aborted (core dumped)
```

#4 - 2019-04-12 08:43 PM - freemor

as with smplayer.. This in NOT easily reproduced. On my fully up to date i686 Parabola system it works flawlessly.

Looks like the problem my be with your system

please see the instructions in the smplayer BR. follow those.

if that step does not fix this we'll have to figure what is bent in your system and why

#5 - 2019-04-12 09:05 PM - Anonymous

Have you installed any foreign packages?

```
$ pacman -Qm
```

#6 - 2019-04-12 09:25 PM - bill-auger

- *Status changed from info needed to forwarded upstream*

this is a known bug already reported upstream - it applies to all QT-based GUI programs - it is caused by the qt5-styleplugins package which was built against the QT in the testing repos

the fix for now is to remove 'qt5-styleplugins' - this will cause all QT programs to be ugly, but they will start

https://bugs.archlinux32.org/index.php?do=details&task_id=65

#7 - 2019-04-12 09:27 PM - bill-auger

- *Subject changed from Octopi broken on 32bit systems to QT GUI programs wont start on 32bit systems*

#8 - 2019-04-12 09:29 PM - v3d

Oh so doomed to ugliness. :)
