

Packages - Bug #2285

cannot build jitsi (no /etc/profile.d/apache-ant.sh)

2019-04-14 07:50 PM - GNUtoo

Status: fixed	% Done: 0%
Priority: bug	
Assignee: GNUtoo	
Category:	
Description	
Hi,	
When trying to build the jitsi package I get:	
<pre> ==> Starting build()... /startdir/PKGBUILD: line 31: /etc/profile.d/apache-ant.sh: No such file or directory</pre>	
/etc/profile.d/apache-ant.sh doesn't seem to be provided by any packages (extra/ant, pcr/apache-ant-contrib, etc).	

History

#1 - 2019-04-14 07:50 PM - GNUtoo

TODO:

- Look if build proceed by creating an empty missing file
- Look where this file is called from, witin the jitsi package

#2 - 2019-04-14 08:06 PM - GNUtoo

- Status changed from unconfirmed to fixed

pushed to git, building new packages
