Worked around enabling an fsf mirror, but not ideal.

daniel_j -

which mirror were you using?

#3 - 2019-04-24 01:36 PM - daniel_j

Enabled in /etc/pacman.d/mirrorlist is only:

Server = [https://redirector.parabola.nu/\\$repo/os/\\$arch](https://redirector.parabola.nu/$repo/os/$arch)

Server = [https://redirector.parabola.nu/\\$repo/os/\\$arch](https://redirector.parabola.nu/$repo/os/$arch)

Server = [https://redirector.parabola.nu/\\$repo/os/\\$arch](https://redirector.parabola.nu/$repo/os/$arch)

Server = [https://redirector.parabola.nu/\\$repo/os/\\$arch](https://redirector.parabola.nu/$repo/os/$arch)

Why four of the same? No idea (edit the comment in the file explains why), everything else was commented out.

I'm unsure if you mean something else, if so let me know.

thats what i meant - that failure just means that some of the arch mirrors do not have that file yet - that is a common situation but usually everything gets into sync within a few hours

if it is the redirector, it could be related to [#2302](#)
