

Packages - Bug #2305

[gsmartcontrol] Unlisted dependency on xterm

2019-04-30 08:07 PM - ivanbakel

Status: not-a-bug	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description gsmartcontrol tries to start xterm in order to get the user to give a root password when updating the drive database. This dependency on xterm is not part of the package information.	

History

#1 - 2019-04-30 09:13 PM - freemor

- Status changed from open to unconfirmed
- Tracker changed from Housekeeping to Bug

I can confirm this behaviour.

We do not package this it comes from Arch [community]
I'll forward it upstream tomorrow if no one does before then.

#2 - 2019-04-30 09:46 PM - bill-auger

freemor if you do forward this upstream, could you mark the issue status as "forwarded upstream" and add a link to the upstream ticket

#3 - 2022-05-08 06:24 PM - Zuss

xterm is listed as an optional dependency on v1.1.4. Can't find an upstream bug report though.
Related PR to adding the xterm dependency:
