Category:			

Description

The following statement is in the wiki (How to help#Server and backup policies)

```
Currently one of our servers is down, so many links in e.g. this wiki page are broken. We need hos
ting and backup policies that will help avoid having the same issue with the currently working ser
ver.
We also need to fix all broken links on working services like this wiki and document where sources
 are now located.
```

Is this issue still relevant? Otherwise I would remove this section in the coresponding article.

History

you can definitely remove that entire section - the article has not been updated in over two years - i dont even remember what problem that was referring to

#2 - 2019-05-20 03:38 PM - theova

Thanks for the quick reply. I have uppdadet the page.
