<b>Description</b> There is Openbox context menu which lists some software, including non-free. Also, there is OpenOffice, but LibreOffice is recommended.	

#### History

##### #1 - 2019-06-27 12:55 AM - bill-auger

the only non-free program i see in the openbox menu is opera - it perhaps would launch opera if it is on the system; but it is on the blacklist, so well its really nothing more than a word - it would be difficult to construe that as a recommendation; because the official recommendation is to keep 'your-freedom' installed, making it impossible to install opera using the system tools

the more significant problem with the default openbox menu is that it is the pre-configured 'static' menu, which does not correspond to the programs that are actually installed on the system - the proper solution is to enable the dynamic menu generation by default

##### #2 - 2019-06-27 02:12 AM - bill-auger

- File *schema.pl* added

- File *menu.xml* added

i have the proper solution worked out; but it would require blacklisting openbox, in order to have it depend on the dynamic menu generator 'obmenu-generator' - in this case, i dont think the benefit justifies the effort though

another plan, one that would add nothing to the workload, would be to have 'your-freedom' watch the 'openbox' package and clobber the default menu with another static (aka: mostly useless) menu - the menu file is in the backup() array; so it is "permissible" to modify it from another package - that would obstruct the user from maintaining customizations to it though, so its not great; but that file can still be over-ridden in the user's HOME dir

anyway, if someone wants to do it:

- add 'obmenu-generator' to the depends() array in the 'openbox' PKGBUILD
- install this custom menu.xml as /etc/xdg/openbox/menu.xml
- install this custom schema.pl as /etc/xdg/obmenu-generator/schema.pl

##### #3 - 2019-06-27 02:13 AM - bill-auger

- Priority changed from *bug* to *feature*

- Status changed from *unconfirmed* to *open*

- Tracker changed from *Freedom issue* to *Feature Request*
