Description	
There are some issues with OpenRC LXDE netinstall ISO:	
<ul style="list-style-type: none">• Passphrase is not asked when connecting passphrase-protected wireless network• some graphical applications issues (at least GParted issue with :0.0 display, which is fixed by `su -` for example, Alt-F7)• locales (I need ru_UA.UTF8 locale, for example, so should I use `su -` after generating it?)• systemd (installer attempts to use systemd which is sometimes blocked by your-initfreedom)• Graphical installer?
