- Status changed from unconfirmed to info needed

What freedom issue? What exactly is the issue? What on the .iso is problematic.

Also, Please do stop with the ASAP. It isn't necessary, it's rather rude, it's not effective, I've told you this in prior BRs

#2 - 2019-08-06 09:37 PM - Anonymous

There are is/old packages with freedom issues which were fixed later.

For example, in LXDE complete systemd ISO, BSOD screensaver from xscreensaver package is included.

- Status changed from info needed to unconfirmed

I'm tagging bill-auger on this, he can confirm whether the isos actually contain packages where freedom issues were identified later.
