Category:	
Description \$ catfish Traceback (most recent call last): File "/usr/bin/catfish", line 41, in <module> import catfish File "/usr/lib/python3.7/site-packages/catfish/__init__.py", line 29, in <module> from catfish import CatfishWindow File "/usr/lib/python3.7/site-packages/catfish/CatfishWindow.py", line 31, in <module> import dbus ModuleNotFoundError: No module named 'dbus' Fixed with install python-dbus Maybe worth add dependence?	

History

#1 - 2019-08-08 12:29 PM - freemor

- Subject changed from [catfish] to [community/catfish]

#2 - 2019-08-08 12:44 PM - freemor

Hmm... working fine for me without: python-dbus, python-dbus-common installed
perhaps the dependency is further down the chain like just 'dbus'?

Perhaps this has been fixed upstream since this BR was filed?

python-dbus depended by python-dbus-common.

Anyway on my 2 machines common problem. Before fix i'm check dependence and didn't have resolve dependence. And now if i check dependence with "pactree -r python-dbus-common" see only python-dbus and nothing more.

#4 - 2019-08-08 02:16 PM - freemor

python-dbus depends dbus. Thus would have pulled it in when you installed python-dbus if it wasn't already in

What Architecture are you on? Might be minor diffs say on i686 if it is V-1 or something

#5 - 2019-08-08 02:47 PM - freemor

- Status changed from unconfirmed to confirmed

Confirmed by rolling a minimal x86_64 VM. Guess removing python-dbus/python-dbus-common from my susyem didn't do a complete job of it. Will report upstream if no one else does before I get a chance to.. Which will probably be tomorrow
